PROJECTS

StoreFront | [live](#) | [Code](#)

Tech Stack : React JS, Redux Toolkit, API, Tailwind CSS

- Built a complete e-commerce application with Redux Toolkit state management, FakeStore API integration, and persistent Local Storage functionality for cart/wishlist across sessions.
- Implemented responsive design with Tailwind CSS custom tokens, Flexbox layouts, and achieving smooth UX across mobile, tablet, and desktop devices.
- Created reusable modular components (ProductCard, ProductGrid, Header, Buttons) and Redux slices for efficient state management and component communication.

TrackIt | [live](#) | [Code](#)

Tech Stack : JavaScript, HTML, Tailwind CSS

- Implemented full CRUD functionality (Add, Edit, Delete tasks) with category-based filtering, enabling users to efficiently organize and manage daily activities.
- Utilized core JavaScript concepts such as event delegation and event propagation to handle dynamic user interactions efficiently, improving performance and reducing redundant event listeners.
- Used Local Storage for data persistence across sessions and built a responsive UI for smooth and consistent user experience.
